DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group (A), claim(s) 15, drawn to a composition containing urocanic acid or functional equivalent and/or an oxidation product thereof.

Group (B), claim(s) 1-8, drawn to a method for scavenging radicals in a substance comprising providing said substance with said composition.

Group (C), claim(s) 9-14, drawn to a method for preparing said pharmaceutical composition.

Group (D), claim(s) 16, drawn to a method for the treatment of oxidative stress of an animal comprising administering said composition.

Group (E), claim(s) 17-19, drawn to a method for modulating an immune response of an animal comprising administering said composition.

The inventions listed as Groups A-E do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature linking groups A-E appears to that they all relate to a composition containing urocanic acid or functional equivalent and/or an oxidation product thereof. However, the claimed composition containing urocanic acid or

Art Unit: 1614

functional equivalent and/or an oxidation product thereof are known in the art (DE 4405585; DE 4328871; Filipec et al., Graefe's Archive for Clinical and Experimental Ophthalmology, "The effect of urocanic acid on graft rejection in an experimental model of orthotopic corneal transplantation in rabbits", 1998, 236(1), 65-68; Uksila et al., "Trans-urocanic acid, a natural epidermal constituent, inhibits human natural killer cell activity in vitro", experimental Dermatology, 1994, 3(2), 61-5; DE 4230076; Hanson et al., "Epidermal trans-urocanic acid and the UV-A-induced photoaging of the skin", Proceedings of the National Academy of Sciences of the United States of America, 1998, 95/18, 10576-78). Therefore, the technical feature linking the inventions of groups A-E does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups A-E are not linked by the same or a corresponding special technical feature as to form a single general inventive concept.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (703) 308-5377. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax number for this Group is (703) 308-4556.
